卷之三

A close-up photograph of a fossilized bone fragment, possibly a vertebra. The bone is light-colored and textured with a prominent, large circular opening (foramen) on the left side. The surface is rough and shows signs of weathering and mineralization.

A close-up photograph of a brown, textured object, likely a plant stem or root, showing a rough, fibrous surface.

The image consists of three separate photographs arranged horizontally. The leftmost photo shows several pieces of ancient pottery, specifically fragments of bowls or plates, with a dark, textured surface. The middle photo is an aerial shot of a submerged archaeological site, showing a grid pattern on the ocean floor through clear, turquoise-colored water. The rightmost photo is a close-up of the interior of a dark, circular pot, showing a grid of thin, vertical metal rods or stakes embedded in the sand at the bottom.
